

Transcranial Magnetic Stimulation for Depression Clinical Trial

Earn up to \$525

Join us in a research study exploring a new form of TMS as a primary treatment for depression in adolescents and teens. TMS is a drug-free treatment for depression that has been used in adults for decades. We are seeking participants aged 14-19 who are experiencing depression and have had minimal prior treatment. Scan the QR code for more information.

Are you eligible?

- Ages 13-20
- Experiencing symptoms of depression
- No prior antidepressant medications OR started within the past 12 weeks and willing to taper

Study requirements

- Participate in daily TMS treatments for 5 days
- Remain antidepressant-free during the trial
- Attend two follow-up visits after completing TMS treatments

Participant benefits

- Innovative, non-invasive investigational treatment
- Avoid antidepressant side effects
- Participate in a study designed for high efficacy and safety
